

Mobile 85-litre Clini Bin for safe, hygienic clinical waste collection. Epoxy-coated steel with foot-pedal operation and castors for hands-free ward use.

The 85-litre Clini Bin offers high-capacity clinical waste containment on an epoxy-coated steel body and mobile castor base. A foot-pedal lid mechanism enables no-touch operation for infection control, and the durable, chip-resistant finish withstands repeated wipe-down cleaning. Its larger volume suits high-throughput wards, theatres and treatment rooms where frequent liner changes are impractical.
