

Compact single-drawer anaesthetic trolley with lockable stainless steel shelf and castors. Secure, mobile storage for smaller theatre spaces.

This compact anaesthetic trolley features a single lockable drawer over a stainless steel shelf, mounted on a mobile castor base. The lock secures controlled drugs and consumables, while the stainless shelf and durable frame resist corrosion and clean easily. Its smaller footprint suits day-theatres, procedure rooms and clinics where space is limited but secure storage is essential.
