

The FS794L is a sunken bath seat that lowers the user's seated position within the bath for comfortable bathing at a reduced height. Dimensions 83?25?40cm, NW 1.6kg, maximum weight capacity 100kg. Lightweight, practical bath transfer and bathing position aid. Available from Vital Medical South Africa.

Sunken Bath Seat for Comfortable Low-Position Bathing

The FS794L is a sunken bath seat designed to provide a stable, comfortable seated surface within the bath tub at a lower height than standard bath board configurations. Unlike a bath bench or board that spans the top of the bath, the FS794L sits within the interior of the bath, positioning the user at a lower seated height closer to the bath floor ? a configuration suitable for users who can lower themselves safely into the bath interior but who need a firm, non-slip seat surface rather than sitting on the bath floor itself. The 83cm length spans the width of a standard bath interior with lateral stability, and the low 1.6kg net weight makes the seat easy to handle and reposition.

Practical Seating Aid for Reduced Mobility Bathing

The FS794L is a practical, cost-effective bathing aid for older adults, post-surgical patients and users with lower limb weakness who prefer a low-position bathing seat within the standard bath environment. The seat surface provides a firm, stable platform that eliminates the discomfort and instability of sitting on a bath floor, improving hygiene and bathing independence for users who require seated bathing but who cannot use a bath bench or shower chair. The 100kg weight capacity covers the majority of the adult user population.

South African Home Bath Aid Supply

At 1.6kg and with simple installation requiring no tools or fixings, the FS794L is the simplest, most affordable seated bathing solution in the Vital Medical range ? appropriate for South African home users and home care programmes requiring a basic, practical bath seating aid. Vital Medical supplies the FS794L to South African home care services, pharmacies and individuals seeking an accessible bath seating solution for daily independent bathing.
