

Neonatal ICU bed-end trolley for chart and equipment storage at the cot. Compact, mobile steel unit designed for neonatal units.

This neonatal ICU bed-end trolley provides compact, mobile storage that fits at the foot of a cot or incubator, keeping charts, monitoring leads and small equipment organised at the point of care. The epoxy-coated steel frame runs on swivel castors and offers a wipe-clean, chip-resistant finish suited to the tight spaces and strict hygiene demands of neonatal intensive care.
