

ICU bed-end chart trolley with 2 drawers and sloping chart top. Mobile steel unit keeps charts and supplies at the bedside.

This ICU bed-end unit combines a sloping chart top with two storage drawers on an epoxy-coated steel frame and swivel castors. The angled top keeps patient charts readable and to hand, while the drawers store documentation and small consumables at the point of care. Its chip-resistant, wipe-clean finish withstands the frequent disinfection required in intensive-care units.
