

Bedside locker with stainless steel top, one drawer and cupboard. Secure, hygienic storage for patient belongings at the bedside.

The **VM-BLSSTWR Bedside Locker with Stainless Steel Top, Drawer and Cupboard** is a clinical-grade patient storage unit designed for environments where hygiene, durability, and infection control are paramount. Combining a stainless steel top surface with a robust epoxy-coated steel cabinet body, it delivers the practical, easy-clean storage that hospital wards, outpatient clinics, and long-term care facilities rely on daily.

Stainless Steel Top for Superior Hygiene

The stainless steel top surface is non-porous, corrosion-resistant, and impervious to spills ? making it highly resistant to bacterial colonisation and easy to disinfect with standard clinical cleaning agents. Unlike laminate or wood-effect surfaces, stainless steel withstands repeated exposure to hospital-grade disinfectants without degrading, staining, or harbouring contaminants. This makes the VM-BLSSTWR the preferred choice for acute care wards, ICUs, isolation rooms, and any setting with stringent infection control requirements.

Practical, Secure Patient Storage

The epoxy-coated steel cabinet houses a drawer and an enclosed cupboard, providing organised, secure storage for patient belongings, personal items, medications, and daily essentials ? all conveniently accessible from the bedside. The chip-resistant body cleans easily and maintains its appearance under the demands of continuous clinical use.

Built for Long-Term Clinical Reliability

The combination of a stainless steel top and epoxy-coated steel body makes the VM-BLSSTWR exceptionally durable and low-maintenance. Both materials are resistant to the knocks, moisture, and chemical exposure inherent in busy clinical environments, ensuring a long service life and

minimal ongoing maintenance costs.

Suitable For:

Hospital wards, ICUs, isolation rooms, outpatient clinics, day surgeries, rehabilitation centres, frail care facilities, and long-term care environments.

Technical Specifications

Specification	Detail
Product Code	VM-BLSSTWR
Top Surface	Stainless steel
Body Material	Epoxy-coated steel (chip-resistant)
Storage	1 drawer + 1 enclosed cupboard
Top Surface	Spill-resistant, disinfectant-compatible
Suitable For	Hospital wards, clinics, ICUs, long-term care facilities
