

Bedside locker with warm wood-effect top, drawer and cupboard. Comfortable, easy-clean storage for wards and care homes.

The **VM-BLWT Bedside Locker with Wood Top** is a practical, patient-centred storage unit designed for use in hospitals, private wards, care homes, frail care facilities, and recovery rooms. It combines the clinical durability of an epoxy-coated steel cabinet with the warm, welcoming aesthetic of a wood-effect top ? creating a bedside solution that feels less institutional and more comforting for long-term patients and residents.

Warm Wood-Effect Top for a Homely Finish

The sealed wood-effect top surface provides a softer visual aesthetic compared to standard clinical white finishes ? particularly valuable in care home and private ward environments where patient comfort and wellbeing are a priority. The sealed surface resists spills and wipes clean effortlessly, maintaining hygiene without sacrificing appearance.

Functional, Secure Storage

The steel cabinet body features both a drawer and a cupboard, giving patients and residents organised, accessible storage for personal belongings, reading materials, medication, and daily essentials ? all within arm's reach from the bed. The epoxy-coated steel construction is robust, corrosion-resistant, and easy to disinfect, meeting the hygiene standards required in clinical and care environments.

Built for Clinical Durability

The epoxy-coated steel body is designed to withstand the rigours of daily hospital and care facility use ? resistant to knocks, scratches, and repeated cleaning with clinical disinfectants. The combination of hard-wearing materials and practical storage layout makes the VM-BLWT a reliable long-term investment for any ward or residential care setting.

Suitable For:

Hospital wards, private patient rooms, recovery suites, care homes, frail care facilities, rehabilitation centres, and step-down facilities.
