

Stacked twin-compartment drug cabinet, 360 x 230 x 440mm, in steel. Two separately locked compartments for segregated storage.

This stacked drug cabinet places one lockable compartment on top of another within a 360 x 230 x 440mm steel body, allowing controlled medicines to be segregated and secured separately. The dual-lock design supports split access or stock separation, and the wall-mountable, powder-coated construction cleans easily and meets requirements for secure drug storage.
