

Two-tier step stool with epoxy frame and anti-slip chequered plate tops. Hard-wearing patient and staff access aid.

This two-tier step stool combines an epoxy-coated steel frame with durable chequered (tread) plate tops whose raised pattern provides excellent slip resistance. The two-step design aids access to beds, couches and equipment, while the rugged plate surface withstands heavy footfall and cleans easily. A dependable access aid for wards, theatres and clinics.
