

Height-adjustable 4-leg drip stand in epoxy-coated steel on castors. Stable, mobile IV infusion pole for wards and clinics.

This four-leg drip stand is built on an epoxy-coated steel column and stable four-leg castor base, offering smooth height adjustment and multiple hooks for IV bags and fluids. The wide leg spread resists tipping during transport, while the chip-resistant coating wipes clean. A dependable, cost-effective infusion pole for wards, clinics and theatres.
