

The Instrument Tray with Cover 18/10 Stainless Steel (VM-IT71-144) is a rectangular instrument tray with matching cover (IT71-140/C) for organising and presenting sterile instruments during procedures. It measures 305 x 205 x 50mm with cover and is manufactured from 18/10 medical-grade stainless steel. It is autoclavable with 134°C steam sterilisation and is used in surgical theatres

and procedure rooms. Available in South Africa from Vital Medical.

Instrument Presentation Tray with Cover

A clinical instrument tray holds sterile instruments in an organised layout so that they are within easy reach during a procedure. The VM-IT71-144 (IT71-140/C) is a rectangular tray that measures 305 x 205 x 50mm with cover. It is used to organise and present sterile instruments, and it is manufactured from 18/10 medical-grade stainless steel for durability and complete sterilisability.

Clinical Uses

Rectangular instrument trays are used to lay out sterile instruments before and during surgical or minor procedures, including suturing, wound debridement, IV line placement, catheterisation and gynaecological examinations. The matching cover (IT71-140/C) allows the tray to be prepared in advance, covered, and transported to the procedure area while maintaining sterility.

Material, Maintenance and Deployment

The tray is constructed from 18/10 stainless steel (18% chromium, 10% nickel), which provides excellent corrosion resistance to repeated steam autoclave cycles (134°C), chemical disinfectants and saline. The smooth interior surfaces are easy to clean and to inspect for residual contamination. The tray should be inspected regularly for dents, cracks or surface pitting that could compromise sterility assurance. Available in South Africa from Vital Medical, the VM-IT71-144 suits surgical theatres, procedure rooms and clinics that need a stainless steel instrument tray with cover.

TECHNICAL SPECIFICATIONS TABLE

Specification	Detail
Brand	Vital Medical
Model / code	IT71-140/C
SKU	VM-IT71-144
Type	Rectangular instrument tray with cover
Dimensions	305 x 205 x 50mm with cover
Material	18/10 medical-grade stainless steel
Sterilisation	Autoclavable (134°C steam)
Application	Instrument presentation
Setting	Surgical theatres, procedure rooms

SKU: VM-IT71-144
